

STAR-HOTEL

Floating hotel

The hotel has 200 double rooms, of which 136 measure 24 m², and several suites in various sizes up to 100 m².

As its name implies, the AquaDomi Star Hotel is star-shaped. The star shape secures views and balconies towards the water for all rooms, and can easily be turned and adapted to suit different locations. At the same time, it creates three soft bays which allow access to the water for the key functions and provide natural mooring spots for small boats. The dynamic figure also provides the necessary symmetrical balance in the water, and reduces the length of the corridors.

Beside its rooms, the hotel also contains a restaurant, conference room, lounge bar, hall, reception, personnel facilities, store room and production kitchen.
